

Fernando Meseguer Fernández

Software Engineer | Frontend and Design System Development.

Skilled in crafting user-centric digital experiences. I led the development and maintenance of our company's first internal component library, driving significant improvements in development efficiency and product consistency.

Work experience

Intern | Operations Engineer

Apr 2017 - Jun 2023

Minderest SL, Murcia

- In charge of Decathlon Iberia Monitoring Operations
- Built a complex price monitoring system across 100 e-commerce
- Project deployed successfully

Operations Engineer

Jul 2017 - Dec 2020

Minderest SL, Murcia

- Led the Price Monitoring Operations for internationally recognized companies like: Telefonica, Douglas, HP, Auchan, and eBay.
- Optimized technical processes that were causing time and money issues for our clients.
- Participated and led customer-focused worldwide conferences to make sure every project was performing as expected
- Completely remade reporting system to cut off issues and automate quick response in case of problems on the price capture system

Full Stack Engineer

Jan 2021 - Dec 2022

Minderest SL, Murcia

- Implemented main application features that helped the company increase its share in key markets like retail and brands using Vue JS, Symfony, and Java.
- Led the development of a stand-alone cutting-edge browser extension that 70% of our clients used to monitor their competitor's prices without leaving their web or the competitor's website.
- Worked with developers, designers, and product managers in a multi-cultural multi-genre highly collaborative space

Designer | Software Engineer

Feb 2022 - Jul 2022

Murcia Soluciones S.L, Murcia

- Designed, built, and published a multiplatform, multi-language real-estate crowdfunding platform on iOS, Android, and Web
- Available on msinvs.com, Google Play, and App Store.
- Designed and prototyped on Figma (low and high-fidelity models) to get feedback from the client.
- Developed using Angular, Swift, Java, TailwindCSS, and Spring Boot.

Front End Engineer

Dec 2022 - Jan 2024

Minderest SL

- Created, developed, implemented, and maintained the first Design System Component Library in the company that changed the way we developed User Interfaces and sped up the development times by 80%
- Used that Design System to build minderest.com in less than a month.
- Took charge of the User Experience, Component Development, Library Publishing and documentation.

Product Engineer

Jan 2024 - Present

Minderest SL, Murcia

- Led the development, maintenance, and expansion of the internal self-created Design System Component Library of the main app.
- Landed a Technical Product Owner role, a bridge that connects the business needs of customers with the technical capabilities of the development team
- Analyze technical requirements to develop high-demand always-up features that rely on complex systems built under different programming languages and environments.
